

Extended abstract

An extended abstract is a concise but detailed summary of an academic work. The purpose of an extended abstract is to give readers a clear overview of the most important aspects of your study or project, including the purpose, methodology, results, and conclusions. Unlike a regular abstract, which is typically very brief, an extended abstract allows for a more in-depth presentation and analysis of your work.

Purpose of the Extended Abstract in the Course

In this course, you are required to submit an extended abstract as part of your evaluation. This document will be used to assess your understanding and your ability to summarize and present key aspects of a topic or project in a clear and concise manner.

Formal Requirements

1. Length: Maximum of 5 pages (2,400 characters per page, including spaces).
2. Page Numbering: Each page must be numbered.
3. Cover Page: The document must include a cover page with the following information:
 - a. Title
 - b. Student's name
 - c. The topic or assignment the abstract addresses
 - d. A comma-separated list of keywords (maximum of 5)
4. Table of Contents: The document must include a table of contents.
5. References: Must be listed in alphabetical order and presented in a recognized academic format.
6. Figures, Tables, and Charts: Must be centered on the page and numbered (see examples below).

Figure 1: A Graph

	Column 1	Column 2
Row 1		
Row 2		

Tabel 1: A table with some data

Note: The cover page, table of contents, and reference list do not count toward the total page limit.

Guidelines for Structure

To ensure that your extended abstract is well-structured and comprehensive, it must include the following sections:

1. Title
2. A precise and descriptive title that reflects the content of your topic or project.
3. Introduction
 - a. A brief background of the topic.
 - b. The purpose of the research or project.
 - c. Any relevant issues or questions that the work addresses.
4. Methods
 - a. A brief description of the methods or techniques used.
 - b. Limitations and advantages of the chosen methods.
5. Results
 - a. The main findings and results from your work.
 - b. Presentation of data or observations, if relevant.

6. Discussion

- a. Interpretation of the results.
- b. The significance of the results in relation to the original questions or hypotheses.
- c. Any implications for future research or practical applications.

7. Conclusion

- a. A summary of the key points.
- b. Any recommendations or conclusions based on the results.

By following this structure, you ensure that your extended abstract is well-organized and thorough, which will help you communicate your work effectively. Remember to comply with the formal requirements and use clear, precise language.
